D SUMANTH REDDY

doddasumanthreddy9@gmail.co
GitHub | LinkedIn | 9030700170

SKILLS

Java
Python
React
HTML
JavaScript
DBMS, SQL
Git, GitHub

SUMMARY

Enthusiastic and dedicated BTech student with a passion for learning and technology. A quick learner with a strong ability to grasp new concepts and apply them effectively. Enjoy working in a team environment, actively engaging with group members to collaborate and solve problems efficiently. Eager to gain hands-on experience and expand knowledge in Full Stack development and related fields.

EDUCATION

Gandhi Institute of Technology and Management
7.04%

PSN's SRI Vivekananda Junior College
72.5%

Vijayam The School

Certifications

- IBM SKILLSBUILD - cybersecurity fluency pathway
- Cisco Networking Academy program- Networking Certifications

PROJECTS

Employee Nomination System | *React, Spring Boot, MySQL*

- Developed a full-stack web application for managing employee nomination workflows.
- *Built the frontend using React and backend services using Spring Boot with MySQL for data persistence.*
- Integrated frontend, REST APIs, backend logic, and relational database components.
- Reference: https://github.com/sumanth1709/Employee-Nomination-System

Defect Dataset Augmentation using GAN (Deep Learning Project)

- Used GAN to generate synthetic images from a surface defect dataset and increase data diversity.
- Improved model performance by reducing overfitting and enhancing generalization.
- Boosted defect detection accuracy by training models on both real and augmented data.
- Reference:https://github.com/sumanth1709/Defect-Dataset-Augmentation-using-Generative-Adversarial-Networks-GAN-

Cybersecurity Threat Dashboard Monitoring (Full Stack Project)

- Developed a real-time cybersecurity monitoring system to detect and visualize potential threats across networks and applications.
- Built an interactive dashboard that displays alerts, attack types, and system vulnerabilities using dynamic data visualization.
- Implemented threat detection logic to identify suspicious activities such as unusual login attempts and abnormal traffic patterns.
- Reference: https://github.com/sumanth1709/Cyber-

Predictive Maintenance AI Agent | Cognizant 2026 Hackathon
Backend API Developer | Python, FastAPI, REST API, SQLite, SQLAlchemy, Scikit-learn

- Developed FastAPI REST APIs for **machine monitoring, failure prediction, alerts, and maintenance recommendations**.
- Integrated APIs with the **database and AI/ML pipeline** and supported React frontend-backend communication.
- Tested and documented APIs using **Swagger/OpenAPI** and implemented request validation, error handling, and CORS configuration.
- Reference: https://github.com/sumanth1709/cognizant-predictive-maintenance-agent
